

Vim Cheat Sheet

Global	Editing	Cut and paste	Working with multiple files	Tabs
: help keyword - open help for keyword	r - replace a single character	yy - yank (copy) a line	: e file - edit a file in a new buffer	: tabnew or : tabnew file - open a file in a new tab
: saveas file - save file as	J - join line below to the current one with one space in between	2yy - yank (copy) 2 lines	: bnext or : bn - go to the next buffer	Ctrl + wT - move the current split window into its own tab
: close - close current pane	gJ - join line below to the current one without space in between	yw - yank (copy) the characters of the word from the cursor position to the start of the next word	: bprev or : bp - go to the previous buffer	gt or : tabnext or : tabn - move to the next tab
K - open man page for word under the cursor	gwip - reflow paragraph	y\$ - yank (copy) to end of line	: bd - delete a buffer (close a file)	gT or : tabprev or : tabp - move to the previous tab
Cursor movement	cc - change (replace) entire line	p - put (paste) the clipboard after cursor	: ls - list all open buffers	#gt - move to tab number #
h - move cursor left	c\$ - change (replace) to the end of the line	P - put (paste) before cursor	: sp file - open a file in a new buffer and split window	: tabmove # - move current tab to the #th position (indexed from 0)
j - move cursor down	ciw - change (replace) entire word	dd - delete (cut) a line	: vsp file - open a file in a new buffer and vertically split window	: tabclose or : tabc - close the current tab and all its windows
k - move cursor up	cw - change (replace) to the end of the word	2dd - delete (cut) 2 lines	Ctrl + ws - split window	: tabonly or : tabo - close all tabs except for the current one
l - move cursor right	s - delete character and substitute text	dw - delete (cut) the characters of the word from the cursor position to the start of the next word	Ctrl + ww - switch windows	: tabdo command - run the command on all tabs (e.g. :tabdo q - closes all opened tabs)
H - move to top of screen	S - delete line and substitute text (same as cc)	D - delete (cut) to the end of the line	Ctrl + wq - quit a window	
M - move to middle of screen	xp - transpose two letters (delete and paste)	d\$ - delete (cut) to the end of the line	Ctrl + wv - split window vertically	
L - move to bottom of screen	u - undo	x - delete (cut) character	Ctrl + wh - move cursor to the left window (vertical split)	
w - jump forwards to the start of a word	Ctrl + r - redo	Exiting	Ctrl + wl - move cursor to the right window (vertical split)	
W - jump forwards to the start of a word (words can contain punctuation)	. - repeat last command	: w - write (save) the file, but don't exit	Ctrl + wj - move cursor to the window below (horizontal split)	
e - jump forwards to the end of a word	Marking text (visual mode)	: w !sudo tee % - write out the current file using sudo	Ctrl + wk - move cursor to the window above (horizontal split)	
E - jump forwards to the end of a word (words can contain punctuation)	v - start visual mode, mark lines, then do a command (like y-yank)	: wq or : x or ZZ - write (save) and quit		
b - jump backwards to the start of a word	V - start linewise visual mode	: q - quit (fails if there are unsaved changes)		
B - jump backwards to the start of a word (words can contain punctuation)	o - move to other end of marked area	: q! or ZQ - quit and throw away unsaved changes		
% - move to matching character (default supported pairs: '()', '{}', '[]' - use :h matchpairs in vim for more info)	Ctrl + v - start visual block mode	: wqa - write (save) and quit on all tabs		
0 - jump to the start of the line	O - move to other corner of block	Search and replace		
^ - jump to the first non-blank character of the line	aw - mark a word	/pattern - search for pattern		
\$ - jump to the end of the line	ab - a block with ()	?pattern - search backward for pattern		
g_ - jump to the last non-blank character of the line	aB - a block with {}	\vpattern - 'very magic' pattern: non-alphanumeric characters are interpreted as special regex symbols (no escaping needed)		
gg - go to the first line of the document	ib - inner block with ()	n - repeat search in same direction		
G - go to the last line of the document	iB - inner block with {}	N - repeat search in opposite direction		
5G - go to line 5	Esc - exit visual mode	: %s/old/new/g - replace all old with new throughout file		
fx - jump to next occurrence of character x	Visual commands	: %s/old/new/gc - replace all old with new throughout file with confirmations		
tx - jump to before next occurrence of character x	> - shift text right	: noh - remove highlighting of search matches		
Fx - jump to previous occurence of character x	< - shift text left	Search in multiple files		
Tx - jump to after previous occurence of character x	y - yank (copy) marked text	: vimgrep /pattern/ {file} - search for pattern in multiple files		
; - repeat previous f, t, F or T movement	d - delete marked text	: cn - jump to the next match		
, - repeat previous f, t, F or T movement, backwards	~ - switch case	: cp - jump to the previous match		
} - jump to next paragraph (or function/block, when editing code)	Registers	: copen - open a window containing the list of matches		
{ - jump to previous paragraph (or function/block, when editing code)	: reg - show registers content			
zz - center cursor on screen	" xy - yank into register x			
Ctrl + e - move screen down one line (without moving cursor)	" xp - paste contents of register x			
Ctrl + y - move screen up one line (without moving cursor)	Marks			
Ctrl + b - move back one full screen	: marks - list of marks			
Ctrl + f - move forward one full screen	ma - set current position for mark A			
Ctrl + d - move forward 1/2 a screen	`a - jump to position of mark A			
Ctrl + u - move back 1/2 a screen	y`a - yank text to position of mark A			
	Macros			
	qa - record macro a			
	q - stop recording macro			
	@a - run macro a			
	@@ - rerun last run macro			
Insert mode - inserting/appendng text				
i - insert before the cursor				
I - insert at the beginning of the line				
a - insert (append) after the cursor				
A - insert (append) at the end of the line				
o - append (open) a new line below the current line				
O - append (open) a new line above the current line				
ea - insert (append) at the end of the word				
Esc - exit insert mode
